## CAREER OBJECTIVE

As a full-stack web developer with a diploma in web development, I am enthusiastic about combining my technical skills with my background in warehousing and logistics. I seek a challenging position that will benefit from both my coding expertise and my hands-on experience in operations. My aim is to contribute to a team that values seamless integration of backend and frontend development, creating user-centric applications that optimize both user experience and operational functionality.

## WORK EXPERIENCE

### Forklift Operator

#### Conestoga Cold Storage

📅 January 2022 - January 2023

📍 Mississauga, ON, Canada

- Order Picking and Fulfillment: Utilized reach trucks to pick and assemble orders according to client requirements, demonstrating strong time management skills.
- Loading and Unloading Duties: Operated forklifts and ride-on pallet jacks to load and unload pallets, contributing to streamlined warehouse operations.
- Team Collaboration: Collaborated with warehouse team members to fulfill complex orders, demonstrating strong communication and problem-solving skills.

## PROJECTS

### [Scheduler](#)

📅 July 2023

- Application developed in React to allow students to schedule meetings with mentors.
- Built using React, Axios, Cypress, Storybook

### [TinyApp](#)

📅 March 2023

- Application to shorten URLs to a readable format.
- Built using Node and Express
